

# TWISTER TRAILER

According to Casey Deary, "I really enjoy the ease of the windows, drop downs and divider gates in a Twister, and the space for the horses in each stall."

Twister is known for offering the most custom options available to truly build a client's dream trailer.

Twister Trailer, based in Fort Scott, Kansas, is proud to be the Official Trailer of the NRHA. Since 1998, Twister has focused on building premium trailers for the equine market, but also livestock, cargo and specialty trailers with the highest-quality materials, craftsmanship and an attention to detail that is unprecedented in the industry.

The trailer designers at Twister are horsemen themselves and they enjoy working with customers to solve any special hauling need, including stagecoach trailers, different loading layouts, and even pigeon trailers! Besides designing unique trailers, Twister is known for offering the most custom options available to truly build a client's dream trailer.

The premium horse trailers manufactured by Twister are built with the highest-quality mate-

rials and many of the components are created in-house, which allows for quality control and the ability to adjust based on each trailer design. Twister Trailer floors are the thickest in the industry and their walls have a smooth appearance due to their unique manufacturing processes. Also, built with heavier-weight aluminum, stronger-wall bracing and welds than in most competitor trailers, Twisters are known for being low maintenance and holding up for a long time, even with heavy use. This quality makes Twisters sought after on the resale market, holding the value of your investment.

In 2012, Twister launched the Select Series trailer. In order to serve a customer who is not in the market for a custom trailer, the Select Series trailer combines the most requested features in a package, giving customers a great value on a premium Twister trailer. The Select Series trailers are offered in three- or four-horse versions, regular or reverse-load, with a 10-foot short wall living quarters. The Select Series trailers have been very popular with discerning horsemen in a variety of disciplines.

Casey Deary, an NRHA Professional trainer and the 2012 NRHA Open Futurity Champion, says, "I have two Twisters, a 10-horse, reverse-load trainer trailer and a 4-horse Select Series with living quarters that I won the use of at the NRHA Futurity last year. I really enjoy the ease of the windows, drop downs and divider gates in a Twister, and the space for the horses in each stall. Also, my Select Series has enough space for

# TWISTER TRAILER™

four horses and all the living quarters' amenities, but I can stop it and feel safe pulling it with a one-ton dually."

Top competitors know the key to winning at high-end events is a horse that safely gets to its destination rested, relaxed and ready to compete. By working with trainers and horsemen who haul thousands of miles a year, Twister has honed in on making a trailer comfortable and convenient for the owner as well as the horses. Twister trailers have the reputation of being the smoothest hauling trailers on the road.

Craig Cameron, a natural horsemanship clinician, hauls his Twister 40 weeks out of the year. He says, "My horses have never hauled better than after I got a Twister. This trailer is just the easiest pulling trailer I've ever had and you notice a difference in the horses arriving fresh and ready to work."

In addition to making the trailer comfortable for the horse, many distinct features on a Twister trailer offer convenience for the owner. Their unique drop-down door latches offer a one-touch opening that is easily reached, even by a shorter person, and their divider latches are operated with little effort, even for a small child. Twister also redesigned their outside walls for 2013, offering more strength and a smoother appearance.

Brent Wright, an NRHA Million Dollar Rider and Professional, says he's had his Twister for about eight years and he still is, "extremely

happy with the quality and features" of his 6-horse trainer trailer, saying it is "a stout, well-built trailer that has held up better than any trailer I have had before" and that "the folks at Twister are great to work with."

As a member of the National Association of Trailer Manufacturers (NATM), Twister is held to the highest standards of trailer safety. The NATM standards are in excess of any government regulations

and Twister has been certified compliant by third-party verification. This gives customers peace of mind that their Twister trailer is built to the highest manufacturing and safety standards in the country, and in excess of any non-NATM certified trailers.

Many of the top trainers and horse-

men in various disciplines trust Twister trailers to haul their equine partners millions of miles each year. Casey Deary, Carol Metcalf, Ann Salmon, Josh Visser, Sean Johnson, Brent Wright, Russell Dilday, Patrick Smith, Trevor Brazile, Craig Cameron, Charmayne James and many more champions are proud to pull Twisters.

For more information on Twister Trailer, visit [twistertrailer.com](http://twistertrailer.com). Twister is proud to support the NRHA and the sport of Reining, and for NRHA members in good standing, we offer a \$500 discount on a new trailer. For details on this program, or to get a quote on a new Twister trailer, please contact Twister sales at 800-974-3944. ♦
